

UCNET

DRIVEN BY  
A **GREAT**  
PASSION.

“THAT’S ONE  
SMALL STEP  
FOR MAN,  
ONE **GIANT**  
LEAP FOR  
MANKIND”.

*(Neil Armstrong, first man on the Moon)*

## Landing on the Moon wasn’t easy, let’s face it.

*But connecting with the whole of Europe from Sardinia wasn’t easy either, considering its position and all that water around it. Many planes and ships have left our beloved island in the heart of the Mediterranean since 2003, when UCNET was a small IT and consultancy firm. What could initially have been seen as a weakness, over the years has become our strength. Today we take on projects from all over Italy and Europe with the same enthusiasm, and still feel close to everyone and far from no one.*

“WHEN HE  
**GREW UP**, HE  
WANTED TO BE  
AN ASTRONAUT.”  
(Teresa, Ugo's Mum)

## He worshipped Jeeg Robot,

*he was fascinated by the infinite possibilities Lego offered and had the time of his life dismantling and reassembling all sorts of contraptions. At the age of 6 he fell in love for the first time, with a Commodore 64, and at 23 he got his first job in computers. Ugo Cuncu, founder of UCNET, has always known what he wanted: a future filled with challenges, a future of innovative technologies and new ways of combining his passion with solutions that can benefit everyone.*

“BEHIND  
EVERY **GREAT**  
MAN THERE’S  
A GREAT  
FAMILY”.

*(Stefania, Ugo's wife and business partner)*

## And UCNET is no exception. It has grown thanks to its passion,

*the determination of its workers and the contagious enthusiasm of Ugo and Stefania, the amazing woman who runs the business with her husband. The company may work in different sectors - energy, home automation, automation, safety and consultancy - but it has been driven by a single goal since 1999: to take the skills of a talented team and transform them into outstanding projects. Without losing that slightly childlike ability to be amazed and have fun, continuously coming up with new technologies, new tools but, most important of all, new ways of satisfying its clients.*

540

litres of coffee  
a year

4.2K

km in go-karts  
every year

16K

kWh saved  
by our clients

96

km of cables  
laid in 2016

960

home automation  
modules installed  
every year

“WITH **GREAT**  
NUMBERS  
COME GREAT  
RESPONSIBILITIES”.

(Antonio, Ugo's accountant)

40

km of cables saved  
thanks to home  
automation

1321

business flights  
since 2005

300

MWh generated in a year by  
our system, the equivalent of:

450

trees planted  
a year

2.5M

km driven in our  
electric car

120

tons of CO2  
avoided a year

56

tons of oil saved

11

“GREAT  
COMPANIES ARE  
BUILT ON **GREAT**  
PRODUCTS”.

*(Elon Musk, CEO Tesla Inc.)*

# Ha

Home automation

## Smart homes.

*Our four walls are beginning to think for themselves. From air conditioning to heating, lighting to controlling electrical appliances, we can create a number of customised scenarios: home automation improves the quality of life and makes our homes a haven of peace we can enjoy day after day.*

# Re

Renewable energy

## Different homes, different energy.

*The sun provides us with light, warmth and energy. Our most precious natural resource allows us to produce clean energy which never runs out, that is why it is important to install a photovoltaic system in your home. Or in your garden if you want, thanks to Smartflower POP, the first all-in-one photovoltaic system that is efficient, easy to install and looks gorgeous.*

# Ds

Domestic storage

TESLA  
POWERWALL  
CERTIFIED INSTALLER

## Self-powering your home.

*There's nowhere better than your home to recharge your batteries. Powerwall 2 by Tesla is a home battery which uses electricity generated by solar panels to recharge, powering your home in the evening or if there is a power outage, making it totally self-sufficient.*

# Em

*Electric mobility*

## Electricity in motion.

*New habits, new needs, new instruments. Our products, like our column with child protection, are the natural evolution of recharging electric vehicles, both in public places and the home.*

# Gp

Great projects

## Transport becomes smart.

*Public transport is fast becoming the best choice. Throughout Italy and Europe, UCNET is the partner and supplier of some of the biggest names on the international transport market (Alstom and Ansaldo STS/Hitachi Group).*

“THE FORCE  
IS STRONG  
IN THIS  
COMPANY.”  
(A **great** client)

## High responsibility.

*We have been involved in the design, installation, configuration, testing and assistance of the most important train management systems since 2003. UCNET's support has often proved crucial when meeting project deadlines; just think of the lines on the Milan underground, one of the factors that contributed to the success of the recent Expo, or the Bologna-Florence high speed line, 78.5 km of tracks which connect the two cities in just 35 minutes.*

## Sustainability on the road.

*From one great project to another: Eneroad, the first electric roadshow in Sardinia. 8 days, 15 places of interest visited, more than 2,800 km in a Tesla Model S: Eneroad was an adventure, a different way of showing that driving an electric car is easier and more exciting than a traditional one. The first ever Eneroad was dedicated to smart, sustainable mobility and took place in conjunction with European Mobility Week 2016.*

The logo for Alstom, featuring the word "ALSTOM" in a bold, blue, sans-serif font. The letter "O" is stylized with a red dot in the center.The logo for Ansaldo STS, featuring a stylized sunburst icon to the left of the text "Ansaldo STS" in a grey, sans-serif font.The logo for ATM (Azienda Trasporti Milanesi), featuring the letters "ATM" in a bold, black, sans-serif font, with a stylized orange and red graphic element above the text.The logo for RFI (Rete Ferroviaria Italiana), featuring a stylized red and blue graphic element to the left of the text "RFI" in a bold, black, sans-serif font, with "RETE FERROVIARIA ITALIANA" and "GRUPPO FERROVIE DELLO STATO ITALIANE" in smaller text below.The logo for Ducati Energia, featuring a circular icon with a stylized "D" to the left of the text "DUCATI energia" in a black, sans-serif font.The Microsoft logo, featuring the four-colored square icon to the left of the word "Microsoft" in a grey, sans-serif font.The logo for easydom, featuring a circular icon with a stylized "e" to the left of the text "easydom" in a blue, sans-serif font.The logo for SCAME, featuring a stylized red and white graphic element to the left of the text "SCAME" in a bold, red, sans-serif font, with "electrical solutions" in smaller text below.The Cisco logo, featuring a stylized graphic of vertical lines of varying heights to the left of the word "CISCO" in a bold, red, sans-serif font.The logo for EJA (Energicamente Sardi), featuring a stylized graphic of three red and blue squares to the left of the text "EJA" in a bold, red, sans-serif font, with "energicamente sardi" in smaller text below.The logo for ASSA ABLOY, featuring the text "ASSA ABLOY" in a bold, blue, sans-serif font, with "The World's Leading Lock Group" in smaller text below.The logo for Solbian, featuring a stylized graphic of a sun to the left of the text "SOLBIAN" in a bold, black, sans-serif font, with "FREEDOM POWERED BY THE SUN" in smaller text below.The logo for bticino, featuring the word "bticino" in a bold, black, sans-serif font, with the "b" in a stylized orange color.The logo for WÜRTH, featuring a stylized red and white graphic element to the left of the text "WÜRTH" in a bold, black, sans-serif font.The logo for HILTI, featuring the word "HILTI" in a bold, red, sans-serif font, with the letters in a stylized, blocky font.The logo for solar edge, featuring the word "solar" in a black, sans-serif font, followed by "edge" in a bold, red, sans-serif font.

## Over to them.

*We'd rather our partners spoke about their experience with us than us going on about ours. Because the technological and human challenges we face and overcome every day are a better indication of our professionalism than a brochure, even though it's as beautiful as the one you are looking at now.*
